

MicrobeCare™ Antimicrobial Coating

MicrobeCare antimicrobial coating protects products from odor- and stain-causing mold, mildew, algae, and bacteria.¹

Benefits

- The antimicrobial coating protects products by attracting harmful microbes, rupturing their cell walls, and then destroying them with positively charge nitrogen molecules.²
- Safe and sustainable, when used as directed; registered with the U.S. Environmental Protection Agency; conforms to our Design for Environment Protocol; meets sustainable building criteria for LEED, Living Building Challenge, Healthy Hospitals/Healthy Interiors (under Exemption 1), and WELL Building.
- Protects treated furniture for up to 12 years, as suggested by independent testing conducted by Ohio Medical.³ Commonly used cleaners and disinfectants can be used on treated products.

Notes:

1. Based on testing conducted by Parasol Medical. Test results can be provided upon request.

2. U.S. Patent Number 8,491,922 (antimicrobial isopropyl alcohol and organofunctional silane solution)

3. Accelerated Age Testing with MicrobeCare (<http://www.microbecare.com/wp-content/uploads/2015/10/Accelerated-Age-Testing-with-MicrobeCare.pdf>)

MicrobeCare Antimicrobial Coating

Key Features

- 1. Non-leaching**
Stays continuously on the surface.
- 2. Colorless and odorless**
The coating doesn't affect the color or smell of the product.
- 3. Doesn't rub off**
Once it has been applied and has dried, the coating is set and won't come off.
- 4. Environmentally safe**
When used as directed, MicrobeCare coating conforms to our Design for Environment Protocol.

How it Works

- Step 1**
The treated surface attracts and then punctures microbes of mold, mildew, algae, and bacteria that cause deterioration, discoloration, odors, and stains.
- Step 2**
The positive and negative ion exchange allows for deep penetration into the core membrane.
- Step 3**
Physical rupture of the cell and electrocution by positively charged nitrogen molecules destroy the cell and prevent it from harming the coated product.
